

ESG approach

Go to bregal.com/responsibility for more information about Responsible

Our commitment to responsible investing

At Bregal, environmental, social and governance (ESG) matters are a fundamental part of our decision to invest in companies, as well as key to our proactive ownership. We believe a company's approach to ESG is a solid indicator of its prospects of long-term, sustainable value creation. During our ownership, we work with each company to address the material ESG issues relevant to their strategy and our investment case.

CEO letter

2021-2022 highlights

Bregal's sector-leading effort to decarbonise portfolios and align with a net zero future

Bregal spearheads the Private Equity Sector Science-Based Target Guidance

As part of the Initiative Climat International (iCI) private equity collaboration on climate action, we co-led an effort with other major private equity firms to develop the first-ever guidance on how to apply the science-based targets methodology to private equity firms and their portfolios.

Known as Private Equity Sector Science-Based Target Guidance, it was launched in November 2021 ahead of the Conference of the Parties (COP26) meeting in Glasgow, UK.

Bregal sets science-based targets

We will reduce our own direct emissions by 50% and ensure all our portfolio companies set their own science-based targets by 2030.

50%

2021-2022 highlights

reduction in Scope 1 and 2 emissions by 2030 $\,$

We joined a group of leading alternative-asset managers in signing up to the Net Zero Asset Managers (NZAM) initiative, to achieve net zero by 2050 or sooner.

The Net Zero Asset Managers initiative

Bregal's portfolio-level science-based targets

To achieve our long-term strategy of net zero, we have set near-term portfolio level science-based targets.

We will:

- Ensure 40% of portfolio companies have set targets by 2025
- Ensure they have all set targets by 2030¹

 Bregal Investments portfolio targets cover 79% of total investment and lending activities by invested capital as of June 30, 2021.
 The remainder not covered by current portfolio SBTs relate principally to our fund-of-funds and credit fund.

2021-2022 highlights

Supporting our portfolio companies and their communities

In spring 2020, in response to the global pandemic, we launched the €3 million Bregal Helps Initiative. The aim was to support our portfolio companies and their local communities and respond in a meaningful way to the largest public health crisis of our times. This has provided 29 grants, to 34 charitable organisations across Asia, Europe and the United States, supporting vulnerable communities with access to basic food needs, education and other essential services.

Overview of funds

Chief Executive Officer's letter

Alain Carrier CEO

I firmly believe that private equity has a fundamental role to play in generating financial value and creating a more sustainable and liveable world. I joined Bregal at the end of 2021, and the firm's purpose and culture, investment approach and track record on ESG have only reinforced my belief that investing responsibly is the right way to do business.

Our responsibility to grow sustainable businesses

Bregal currently has more than €12 billion of assets under management, across six teams, with capital invested in over 70 portfolio companies. Over the next few years, we expect that number to grow as we launch new funds and develop complementary strategies. This provides us with an enormous opportunity to build sustainable companies that contribute to positive environmental and social change.

Global pandemic

Our deep sense of purpose, rooted in our heritage, was translated into action in many ways in 2021. As the effects of the pandemic grew deeper, for example, we worked with our portfolio companies to support the most vulnerable in their communities. We did so through the Bregal Helps Initiative - a €3 million Covid-relief fund established with COFRA Foundation and Bregal senior management. Given the initiative's reach and ability to respond swiftly to the wider global geopolitical events and economic impacts, we will continue the Bregal Helps Initiative this year. To this end, we have pledged an additional €2 million to further support the most vulnerable communities.

Climate change

Part of our culture and how we do business also means being ahead of current thinking. In light of the urgent climate crisis, and recognising the role the private sector has to play, I am pleased Bregal spearheaded the development of the Science-Based Targets initiative (SBTi) guidance for the private equity sector. In line with the guidance, we became one of the first seven private equity firms to set firm-wide and investment-level carbon-emission-reduction targets.

Since setting our targets, we have been working with all our portfolio companies to set climate targets and to take concrete measures to decarbonise their businesses. Recognising that funding is essential for the transition to a low-carbon economy, we have also increased the size of the Bregal Sustainable Development Fund by 25%, to €50 million. The Fund provides financing at attractive terms to existing Bregal portfolio companies, to fund improvement initiatives aligned with the UN Sustainable Development Goals.

Diversity, equity and inclusion (DEI)

2021-2022 highlights

Across the Bregal employee base, while we now see over 30 nationalities represented by our 180 employees, we appreciate the work that we still have to do. To maintain our strong culture and competitive advantage, and to keep attracting the best talent, we continue to assess our inclusive business practices. In 2021, we engaged a specialist diversity consultant to identify gaps and areas of improvement for our US funds. Recommendations included requiring us to meet a diversity target for new hires, recruiting a senior executive to build a Bregal-wide DEI improvement plan and continuing to work with credible external partners to promote DEI initiatives. In Europe, Bregal Unternehmerkapital's (BU) dedicated Diversity & Inclusion Committee (established in 2020) set specific goals in 2021 at the investment team and portfolio company level. At the portfolio level, we look to continue setting diversity targets for the Board and C-suite across all our funds. We also support external organisations such as Level20 and Sponsors for Educational Opportunity (SEO) to advance ethnic, racial and gender diversity in our industry.

Looking ahead

We aim to transform businesses holistically and successfully. We do so in a way that is responsible and leads to positive outcomes for our portfolio companies, our communities and society at large. While this requires us to be creative in tackling challenges in the short term, I am convinced we have the right people and culture in place to achieve our goals. I am excited by the prospect of a growing business – with increasing assets under management across diversified strategies – invested in companies that share our values and ethos.

Alain Carrier CEO

At Bregal, we aim to transform businesses holistically and successfully. We do so in a way that is responsible and leads to positive outcomes for our portfolio companies, our communities and societies at large.

ESG approach

Alvar de Wolff Head of ESG & Responsible Investing

Reflecting on the past year, Lam certain that 2021 will come to be seen as a pivotal year for climate in a decisive decade of action.

The COP26 meeting in Glasgow and recent Intergovernmental Panel on Climate Change report, have been a wake-up call for humanity and made it very clear that our window of opportunity to limit global warming to 1.5°C – and thus stave off climate disaster - is closing fast.

2021-2022 highlights

At the same time, there are reasons to be positive. 2021 was the first year corporates engaged en masse with the COP26 process – reinforcing the role businesses must play in addressing the climate crisis.

Indeed, across the financial spectrum there has been a clear shift, and a realisation of the potential positive changes the financial sector can create, if it acts now.

Initiatives such as Net Zero Asset Managers (NZAM) and Glasgow Financial Alliance for Net Zero, have further galvanised corporate commitments and emphasised the role that both public and private markets must play in meeting global climate goals.

At Bregal, we recognise our responsibility, and the role we must play to support our companies in moving towards a low-carbon economy. As such, throughout 2021, we undertook a number of initiatives focused on climate action:

1. Engaging the Initiative Climat International to spearhead the development of science-based target-setting guidance for the private

- equity industry, alongside best practice carbon-footprint guidance for private equity investors.
- 2. Kicking off our long-term climate strategy – building on our engagement with the iCI – by committing to near-term science-based targets across our business and portfolio, and joining the NZAM initiative. As such, we will:
 - Reduce Bregal's direct emissions by at least 50% by 2030;
 - Ensure 40% of portfolio companies have set science-based targets (SBTs) by 2025; and
 - Ensure 100% of our portfolio companies have set SBTs by 2030. ten years faster than required by the SBTi.
- 3. Supporting our portfolio companies in developing carbon reduction roadmaps, setting SBTs, and aligning their businesses with a net zero trajectory, while monitoring the progress of decarbonisation across our investment portfolio.
- 4. Increasing Bregal's Sustainable Development Fund (SDF) to €50 million, to finance transformative sustainability programmes – recognising that availability of capital and the need for financial return are a barrier to funding decarbonisation initiatives for portfolio companies.

We partner with our portfolio companies to develop carbon reduction roadmaps and align them with a net zero trajectory. This work will be a central part of our ESG programme in the coming years.

Working with portfolio companies on their climate strategies will form a central part of our ESG programme in the coming years, while the SDF will be key to achieving carbon reductions by providing capital at attractive terms.

We are also looking into how we can invest beyond our own value chain to support ambitious climate action. Through exciting opportunities emerging in nature-based solutions and technologies that support positive outcomes for people and planet, our next steps will put impact firmly at the heart of our agenda.

Alvar de Wolff

Head of ESG & Responsible Investing

Our Climate Action Plan

We have set near-term science-based targets for Bregal and our portfolio companies, the first step in our longer-term strategy for achieving net zero.

We have also committed to NZAM to achieve net zero by 2050 or sooner. In the near term, Bregal is also working on 'aligning' its portfolios towards achieving net zero in adherence with the Institutional Investors Group on Climate Change (IIGCC) Net Zero Investment Framework. Our goal is to achieve 'aligned' status across all our portfolio companies by 2050.

Bregal's science-based targets:

-50%

Reducing direct emissions by 50% by 2030

40%

Ensuring 40% of our portfolio companies will have set science-based targets by 2025²

100%

Ensuring all our portfolio companies have set science-based targets by 2030²

Industry engagement on climate

2021-2022 highlights

Collaboration and leadership with climate-focused industry initiatives and working groups across the financial sector.

Reducing our GHG emissions

While continuing efforts to reduce our Scope 1 and 2 emissions¹, we are prioritising the reduction of our 'invested' emissions by supporting portfolio companies to set near-term science-based targets¹.

Investments to achieve portfolio-level emissions reductions

Investing behind environmental improvement projects via the €50 million Bregal Sustainable Development Fund.

Investing in climate solutions

Increasing investments in 'climate solutions' such as nature-based solutions, renewable energy and energy efficient technologies.

Supporting portfolio companies to adopt near-term science-based targets:

1. Carbon footprint assessment

Collect, aggregate and assess baseline carbon footprint across Scope 1 and 2 and material Scope 3 categories.

2. Decarbonisation roadmaps

Identify reduction pathway and levers including energy efficiency initiatives, renewable power purchase agreements, renewable energy certificates and supply chain reductions through collaborative initiatives.

3. Company engagement

Engage company management on carbon footprint, reduction pathway and cost estimates to set and achieve carbon reduction targets.

4. Target setting

Partner with company management to complete the SBTi target setting requirements.

5. Science-based target validation

SBT to validate and approve targets over a 1–3-month period.

- 1. Bregal emissions inventory (2021): Scope 1: 85.7 mtCO₂e; Scope 2: 111 mtCO₂e. Since 2017, we have chosen to mitigate our Scope 1, 2 and select Scope 3 emissions (business travel, waste, energy related) through the purchase of offsets. In 2022, we have once again neutralised these emissions sources by investing in high-quality carbon credits which generate environmental and societal co-benefits relating to water and soil quality, enhanced biodiversity and livelihood improvements for local communities. We continue to prioritise emissions reductions over offsetting, but see a role for carbon credits to drive immediate climate action in addition to our own reduction efforts.
- 2. Bregal Investments portfolio targets cover 79% of total investment and lending activities by invested capital as of June 30, 2021. The remainder not covered by current portfolio SBTs relate principally to our fund-of-funds and credit fund.

ESG integration

We ensure ESG is part of the entire investment lifecycle during diligence, through active ownership and at exit. We aim to maximise the ESG value proposition for our portfolio companies by improving priority ESG aspects over the course of our holding period, deploying capital to companies as they work towards greater environmental or social sustainability and supporting their communities.

ESG due diligence

Our funds apply principles and exclusionsbased ESG screening criteria to enhance the deal diligence process and assess risks and opportunities adequately.

2021-2022 highlights

Value creation

Our funds work with portfolio companies to ensure best-practice ESG performance, invest in sustainable value-creation initiatives and contribute to communities affected by our portfolio companies.

Exit positioning

Our funds seek opportunities to enhance exit positioning through demonstrable ESG best practices.

Prioritise

Prioritise material ESG risks and opportunities, to support portfolio companies in achieving best-practice ESG governance and performance.

Support portfolio companies in implementing sustainability programmes through the Sustainable Development Fund.

Contribute

Help our portfolio companies' communities through the Bregal Helps Initiative.

CEO letter

Prioritise

Post-closing, we engage with portfolio company management to prepare a value-enhancement plan, including an ESG roadmap, to guide strategic direction and to prioritise initiatives.

2021-2022 highlights

ESG reviews consist of a prioritisation of ESG issues, an overview of short-term and medium-term initiatives to improve ESG performance, and KPIs to report and monitor progress.

In reviewing, we work with portfolio companies to move beyond compliance to make ESG considerations an integral part of their value-enhancement plans. By providing appropriate ESG roadmaps, we aim to enhance strategic direction and prioritise ESG initiatives.

The Boards of Directors of each of our portfolio companies are our primary platform for monitoring ESG performance and progress. We work regularly with all our portfolio companies to discuss ESG priorities at least once a year.

Material issues and example KPIs that we track as part of portfolio companies' ESG roadmaps

Environment

- Electricity, fuel and data consumption
- Renewable energy
- Business travel
- Carbon emissions and intensity
- Waste management

Social

- Work related injuries
- Days lost due to injuries
- Employee satisfaction
- Community contribution
- Workplace harassment

Governance

- · Code of conduct
- Anti-bribery and corruption
- Whistleblowing policy
- Under-represented groups at Board and senior management
- Reporting and data breaches

Invest

Supporting our portfolio companies' ESG ambitions through loans at attractive arms-length terms, to finance improvement initiatives aligned with the UN Sustainable **Development Goals.**

The €50 million Bregal Sustainable Development Fund provides low-interest loans to existing portfolio companies to invest in improvement projects that contribute to their sustainability performance.

Since launching in 2018, the goal of the SDF has been to support portfolio companies in moving their business models towards greater environmental or social sustainability by providing capital for improvement projects that meet strict FSG criteria.

To date, we have deployed 32% of the SDF to fund projects including the reduction of carbon emissions, water management, improved quality of care, and renewable energy.

Eligible projects

Projects eligible to receive funding from the SDF are those that improve the sustainability performance of the company on ESG aspects relevant to the business.

Improvements might be within the company's own operations as well as upstream in the supply chain or downstream at the consumer level.

Eligible projects include, but are not limited to, the following:

Renewable energy

Energy efficiency

11

Investments related to new and ongoing renewable energy projects, such as solar panels, wind, biomass projects or associated energy-storage solutions.

Investments in production processes, green buildings, or product-efficiency improvements of at least 20% compared with the existing technology or asset base.

Ecosystem impact

Investments in reducing the impact of operations or of supply chains on terrestrial and aquatic biodiversity. Projects to protect and conserve nature.

Emissions and waste

Projects to reduce emissions from the company's own operations or supply chain. Investments related to projects that enhance recycling, material recovery, reuse and landfill waste diversion.

Water management and conservation

Sustainable product development (p)

Development and introduction of more environmentally friendly products, potentially with eco-label or environmental certification. sustainable packaging and distribution.

Investments in water-efficiency projects such as upgrades to water-efficiency fixtures or investments in water filtration.

Supply chain improvements

Investments in enhancing operating standards of suppliers through improvements in health and safety standards, chemical use, liveable wages and supply chain transparency.

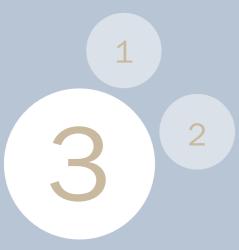

Other initiatives

Any initiatives with a material positive impact on the company's social or environmental performance, relevant for the business but not covered by the other categories.

Case studies

Contribute

In spring 2020, in response to the global pandemic, our senior management team together with the COFRA Foundation, launched the €3 million Bregal Helps Initiative.

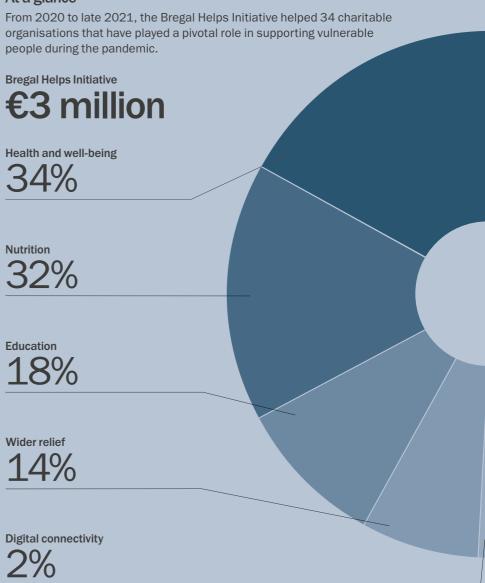

2021-2022 highlights

The aim was to help our portfolio companies and funds in their objectives to support local communities affected by the pandemic.

It aimed to, and continues to, provide essential immediate relief to our local communities, as well as to enable long-term positive impacts. Charitable projects were started by portfolio companies as well as our employees.

At a glance

CEO letter

Second Bregal Helps Initiative launched in early 2022

As the immediate effects of the pandemic have eased, the second Bregal Helps Initiative fund pivoted to continue supporting the most vulnerable communities across three pillars:

Education, skills and career mobility

Diversity and inclusion

Community development

Since its launch, the Bregal Helps Initiative has provided 29 grants to 34 charitable organisations, supporting the most vulnerable groups in our communities affected by the pandemic. Read about some of the noteworthy initiatives below.

Overview of funds continued

Managing Partner

While there are numerous opportunities to make positive changes in the technology sector, through digitalisation and efficiency, we are also keenly aware of the sector's environmental and human-capital risks. such as the environmental impact of data centres and present-day challenges with employee engagement and retention.

Considering such risks, the past year has been hugely successful for Bregal Sagemount's ESG programme, with the launch of our proprietary Sagemount ESG Standard, and three portfolio companies setting science-based emissionsreduction targets. For the first time, we also included an ESG-specific session at our annual Big Exit Conference, providing insights for our portfolio CEOs on successful governance, cyber security, and diversity initiatives.

BregalSagemount (Equity)

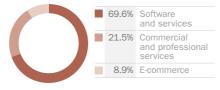

Flexible capital and strategic assistance for market-leading companies in high-growth sectors

2021-2022 highlights

Note: All figures presented are as of December 31, 2021 unless otherwise stated.

Highlights

- Introduced the Sagemount Standard and assessed 11 companies across Sagemount Fund II and III, with three companies meeting the Standard in 2021
- · Committed to set science-based targets across the portfolio – with three companies setting SBTs in 04 2021
- Further deployment of Bregal Helps Initiative, supporting nine initiatives across nine charities in our local communities
- · Portfolio companies aimed to achieve at least \$10 million of business continuity insurance as a safeguard for potential cyber-security breaches

- Support portfolio companies in assessing their carbon footprints, setting ambitious science-based targets and working towards aligning with the Sagemount ESG Standard
- Further integrate the Bregal Sagemount ESG programme into the Alpha Growth Program – ensuring ESG focus in the first 100 days of investment as part of Sagemount's ESG valueenhancement programme
- Support implementation of governance-related policies and procedures across the portfolio
- · Seek opportunities to invest in transformative sustainability programmes through the Bregal Sustainable Development Fund

Florian Schick Managing Partner

Once again, ESG has featured as a prominent part of our ownership approach for our portfolio companies. In 2021, we completed the annual ESG roadmap-review process for our portfolio companies, and over half the companies completed their third consecutive annual review.

This year was particularly important given the commitments we had made in November 2021 for our portfolio companies to decarbonise, aligned with the Science-Based Targets initiative. As such, this year's ESG reviews were an important step towards establishing emissions baselines for Scopes 1, 2 and 3 that our companies can use to validate and monitor their climate targets.

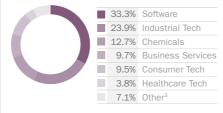

Bregal Unternehmerkapital

Partner of choice for entrepreneurs and family-owned businesses in the DACH region/Northern Italy

Highlights

- · ESG reviews completed across BU I, II and III, with seven companies undertaking their third annual review cycle. Across the portfolio there was significant progress and strong management engagement
- · Detailed carbon-footprint assessments conducted as part of the ESG reviews, including Scopes 1, 2 and 3, to identify emissions-reduction opportunities
- Full science-based portfolio coverage targets established for 2030 following new private equity sector SBTi guidance
- · Six initiatives supported as part of the Bregal Helps Initiative – supporting eight charities across health & well-being and education
- Internal D&I committee established in 2020, set specific D&I goals in 2021 across investment team and portfolio companies

- · Work with portfolio companies to set science-based targets across BU portfolio
- Deploy Bregal Sustainable **Development Fund loans** across the portfolio to support transformative sustainability projects
- · Ensure strong approach to ESG data and reporting, to prepare portfolio companies for future regulatory reporting requirements

Overview of funds continued

Jan Bruennler Managing Partner

Bregal Milestone's ESG programme has gone from strength to strength throughout 2020 and 2021, despite the obvious challenges faced by companies globally.

The success of our investment approach and our strong ESG programme is particularly apparent through the natural alignment that the companies have with the UN SDGs. We are extremely positive about the opportunities presented by working with purpose-driven technology companies whose products and services can contribute to a more sustainable future.

Highlights

- Completed 2020/2021 annual ESG review cycle for all portfolio companies² and conducted mid-year progress assessments in Q3 2021
- Finalising 2021/2022 review cycle for 11 companies, including specific focus on carbon footprint assessments for Scopes 1, 2 and 3, and cyber-security risks
- Science-based targets established for full portfolio for 2030 following new private equity sector SBTi guidance
- Integrated proprietary ESG scoring into deal-sourcing capability to refine search for European technology champions
- Supported eight charitable programmes, across 11 charities, as part of the Bregal Helps Initiative. The charities covered health & well-being, digital connectivity, nutrition and education
- Team directly contributed over 50 hours of employee time to charitable initiatives in London

- Enhance focus on purpose-led technology champions who contribute to society and solve environmental issues
- Further develop the proprietary ESG component of our deal-sourcing capability
- Prioritise ESG improvement plans when working with company boards to drive ESG improvements and realise value

Charles Yoon Managing Partner

ESG is central to how we make investment decisions and how we work with our portfolio after investing. Our portfolio companies, largely founder-led businesses in the consumer and multi-unit, food and beverage, and business services sectors, are increasingly aware of the non-financial factors that add value for their employees, customers, suppliers and investors.

By managing issues such as food safety, or by targeting a no-incident rate in our portfolio facilities, we not only have safer employees, but also increase profitability and reduce our costs over time. It is a win-win.

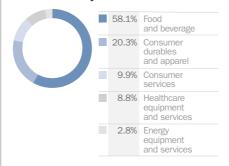

BregalPartners

Building world-class businesses in the middle market in North America

Bregal Partners is a highly collaborative partner for middle-market companies in North America, helping management teams build long-term value. We assist with strategic planning, growth strategy, talent acquisition, and sharing best practices, in three main markets: consumer and multi-unit, food and beverage, and business services.

Jan Faber Managing Partner

BPEP's approach to ESG has continued to evolve over the past year, while maintaining a focus on working with general partners (GPs) who share our ESG values and principles.

Indeed, in 2021, we changed our approach to assessing the ESG credentials of potential GPs by introducing an internal scoring methodology. Our ESG Scorecard considers ESG integration, management and reporting within the investment process, alongside GP approaches to the key themes of climate and diversity, to assess their outlook on ESG topics.

As a fund of funds, we do not subscribe to the belief that we are too far removed from the investment process to be able to change matters. Instead, we work with GPs to ensure they consider ESG in investment approaches, through responsible investing policies, side letter requirements and by engaging on ESG topics during the entire investment lifecycle. We will continue to develop this approach.

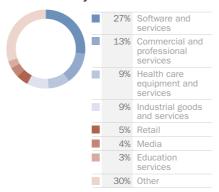

BregalPrivateEquityPartners

Private equity funds, co-investments and secondaries

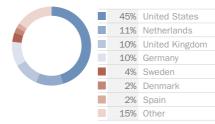

Bregal Private Equity Partners (BPEP) manages a diversified portfolio of private equity fund investments, with about 200 commitments made since 2002. The team also makes co-investments and invests in secondary transactions.

BregalSagemount

DentalXChange

Overview of funds

DentalXChange is one of the largest independent dental payments and claims processing platform in the United States processing millions of patient claims annually through its integration into more than 40,000 dental practices and nearly all dental payers nationwide. Its solutions streamline the remittance cycle by automating workflows, enabling digital information exchange, and embedding payments across the value chain.

Our investment opportunity

Financial profile: At the time of investment, the company generated more than \$35 million in revenue run-rate, growing rapidly with strong FCF conversion as a Rule of 60+ SaaS business

Payer and Provider retention: The company has a resilient model, demonstrated by 95% gross retention on claims volume

Large proprietary data repository: With every patient visit, DentalXChange builds on top of an expansive trove of data, providing unique insights to provide payers and providers alike, spanning over 40 million annual claim-related events

Overview

Sector	Software and services	
Head office	Irvine, CA	
Employees	98	

Our ESG KPIs

Environment KPI 1	Carbon intensity
Social KPI 2	Female diversity at senior management level. Sector average of 21% per high tech executive level data ¹
Social KPI 3	Employee Net Promoter score

Material themes

Cyber security

Ensuring data privacy and cyber security are well managed with strong processes in place, including having extensive subject-matter expertise throughout the corporate hierarchy

Governance

Achieving best-in-class governance practices in ethics and compliance, social and labour conditions, and diversity and inclusion

Employee engagement

Developing an engaged and diverse workforce across the organisation

Climate action

Assessing baseline carbon footprint and implementing a decarbonisation plan to set and achieve science-based targets by 2030

2021 highlights

DentalXChange has continued its track record of resilient growth despite macro volatility, and we have been impressed with the speed by which the company has implemented good ESG practices.

Highlights include:

ESG integration into Alpha plan

DentalXChange is the first company to integrate priority ESG actions into the Growth Factors Alpha Growth Plan (Sagemount's value creation plan) in the first 100 days after investment. ESG value creation is integrated into the exit readiness lever of value creation.

Good governance

The company implemented good governance practices, including an employee handbook outlining compliance protocols for employee conduct. It also introduced an online advertising and marketing content review process to comply with the CAN-SPAM Act².

Plus, it rolled out an anonymous whistleblower hotline for employees to raise concerns, and implemented annual anti-harassment and anti-discrimination training for all employees.

Data privacy and cyber security

The company has been HITRUST³ certified since 2019, and conducts Health Insurance Portability and Accountability Act (HIPAA) assessments and SOC 1 audits regularly. In 2021, the company increased business continuity insurance coverage to \$10 million, and it conducts internal and external mock incidence-response and penetration tests.

2021-2022 highlights

Setting climate targets

DentalXChange has submitted sciencebased targets, and is the first Bregal Sagemount Fund III company to do so. As part of its decarbonisation plan, it procured renewable-electricity certificates from the Bonneville Environmental Foundation for its 2021 emissions, and is shifting its current plan to procure green electricity directly from the grid, from Southern California Edison.

revenue growth as of December 2021

insurance coverage

Our connectivity and flexibility to provide payment solutions across the dental industry value chain allow us to effectively support customers at all levels. To enhance efficiencies for our dental customers. we will continue to be a trusted partner looking for opportunities to generate faster payment processing by reducing friction and reducing our carbon footprint. We are honoured to have supported the dental industry with our payment solutions since 1989, and look forward to meeting the demands of our customers.

Our investment opportunity

High-quality product: With a loyal customer base

Growing market share in Europe and in the United States: Leading children's bike brand with a 12% market share in DACH countries and a growing share in the US. The bikes are distributed directly to consumers (B2C) through the company's own online shop, as well as through dealerships and partner importers (B2B)

Product circularity: Strong product circularity and secondary-sale market

Overview

Sector	Consumer, health and leisure	
Head office	Klosterneuburg, Austria	
Employees	170	

Our ESG KPIs

Environment KPI 1	Carbon intensity	
Social KPI 2	Gender diversity (across employee base)	
Governance KPI 3	% of suppliers signed woom Supplier Code of Conduct	

Material themes

Energy and carbon

Reducing emissions and energy consumption related to the production and sourcing of bike components and logistics

Material circularity

Building and ensuring design quality and ease of repair, ensuring a long life span

Product impact

Designing product specifically to fit the anatomy of children and ensure maximum safety

Climate action

Ensuring adequate ESG oversight of the supply chain

В

2021 highlights

woom has become a leading global children's bike brand – as shown by its 45% growth since early 2021. The company is particularly known for the sustainable materials it uses to create truly durable and lightweight bikes for children.

Optimised production

woom recently relocated its production for the European market from Cambodia to Poland, where 80% of bikes destined for European markets are now made. This has had a significant positive impact on transport-related emissions.

45% revenue growth since early 2021

Bicycle exchange programme

woom's 'upCYCLING' programme offers customers 40% off the purchase price of a new bike, when returning an old model for refurbishment and resale. The significant secondary-market for woom bikes is testament to the products' quality and durability.

2021-2022 highlights

Community engagement

In 2021, supported by the Bregal Helps Initiative, woom raised €80,000 through their Giro del Gelato initiative – which encouraged children to get out on their bikes and raise money, by sponsorship per kilometre cycled, for UNICEF's water, sanitation and hygiene (WASH) programme in Dhaka, Bangladesh.

40%

off the purchase price by using woom's 'upCYCLING' programme

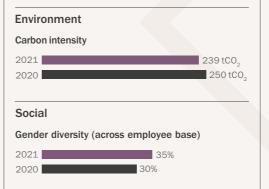

€80,000

raised supported by the Brega Helps Initiative woom's founding mission is to convey a love of cycling to children. By operating sustainably, we ensure not only that our business is efficient and well run, but also that we are supporting a future in which subsequent generations can prosper on two wheels, or otherwise.

Mathias Ihlenfeld

ESG key performance indicators

Governance

Supplier Code of Conduct signatories

2021 52% 2020 0%

Note: This represents the percentage of suppliers that has signed the company's Code of Conduct in year 1. The Supplier Code of Conduct was introduced in 2021 based on UN Global Compact and ILO Standards.

ESG opportunities

Emissions reduction

woom recognises the need to address its own carbon footprint and formalise commitments to reduce emissions by setting science-based targets in 2022. The company has begun the process of setting targets by conducting a full carbon footprint assessment as part of its 2021 annual ESG review.

Supply chain performance

Ensure fair labour conditions throughout its supply chain is a key priority for woom, which aims to guarantee that all its suppliers will comply with its ESG requirements by 2025. As a first step, the company is working to define its ESG assessment criteria and communicate these with suppliers.

ESG strategy, governance and reporting

Given woom's strong growth potential, it is looking to expand its team of dedicated ESG resources internally, and implement detailed governance policies to help guide its ESG strategy.

2021-2022 highlights

Overview of funds

Our investment opportunity

Product: An ecosystem designed to offer the best delivery experience and to be more efficient than competitors

Market: First mover advantage in e-commerce markets cemented by global customers like Amazon and Zara (Inditex)

Operations: Efficient operations with a proven track record of scaling, creating a unique position in the market as the EU's largest scheduled deliveries operator (consumers can select a specific delivery window)

Sector	Transportation/delivery solutions	
Head office	Barcelona, Spain	
Employees	3,000+ in total, 240 in its head office in Barcelona	

Our ESG KPIs

Environment KPI 1	CO ₂ emissions	
Environment KPI 2	Renewable energy use in the office and distribution centre	
Social KPI 3	Reduce absenteeism below industry average of 1.6%	

Material themes

Energy and carbon

Primarily energy consumption (including servers and buildings) and business travel

Employee health and well-being

Focusing on the health and well-being of the large and growing employee base

Sustainable transport

Working to reduce total vehicle emissions

В

2021 highlights

2021 was an important year for Paack. In addition to an incredible company growth rate of 3.5x annually, it also accomplished some of its most important ESG goals. These include:

Carbon footprint

To reduce its carbon footprint in 2021, Paack focused on increasing zero-emission deliveries and set a target of improving its first-time delivery success rate to 94%. In Birmingham, Liverpool and Manchester, the team accomplished 100% zero-emission deliveries, and helped set up 220 charging stations to provide energy for its vehicle fleet into the future. Its first-time delivery success rate was a strong 96%, leading to a best-in-class consumer rating of 4.8/5.

Paack became the first UK logistics business to sign the United Nations pledge for carbon neutrality – Climate Neutral Now.

The company also established a goal of obtaining more of its energy from renewable sources during 2021. In addition to accomplishing this, it is currently investigating a project to purchase batteries for its warehouses so it can store renewably generated energy during the day for use at night.

Health and safety

Paack started 2021 with the ambition of ensuring that all its facilities achieve the highest safety standards, to guarantee the health and well-being of its employees. To support this, the team successfully rolled out health and safety e-learning modules to all employees.

2021-2022 highlights

The company also implemented internal and external audits to ensure compliance with key health and safety programmes. As a next step, it plans to broaden these audits to include transportation fleet partners.

Community engagement

Paack's ambition doesn't stop inside the business – it also wants to improve the communities where it works. That's why in 2021, together with the Bregal Helps Initiative, the team arranged a €100,000 grant to *Banc dels Aliments*, a charity in Catalonia that recovers food surpluses and donates them to people living in poverty. By combining the grant with Paack's logistics expertise, the company was able to deliver 79,942 meals to families living with food insecurity.

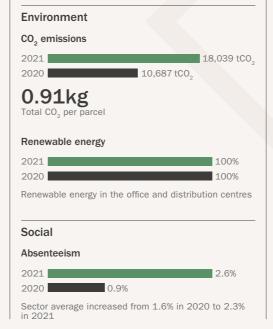

€100,000

Having grown at over 200% annually in recent years, our ambition is to continue this trajectory while being a resilient and sustainable business.

We're pleased with what we accomplished in 2021, but even more excited about what is still to come as we continue on our mission to be Europe's greenest and safest delivery company.

Fernando Benito Galobart
Paack Chief Executive Officer

ESG key performance indicators

ESG opportunities

Transport diversification and optimisation

Paack's logistics form the majority of its carbon emissions. By switching to zero-emissions vehicles, optimising routes and reducing the number of delivery attempts, the company can decrease emissions by last-mile deliveries. It also aims to eliminate CO₂ emissions generated by delivery vehicles by further reducing the number of delivery attempts by 2022, and moving fully to zero-emissions alternatives by 2023.

Producing renewable energy

Paack operates several large warehouses, and by installing solar panels on their roofs, it could substantially reduce its greenhouse-gas emissions and therefore its carbon footprint.

Lean management culture and employee health and safety

Paack values outsourced employees (drivers) in its business. Implementing a lean management culture, providing adequate health and safety training, and following up on external risk assessments and health and safety reports, will help to further improve employee well-being.

BregalPartners

Juniper

Juniper is a commercial landscaping business, providing installation and contractual maintenance services to large commercial clients, such as homeowners' associations, planned communities, homebuilders and municipalities.

Our investment opportunity

Accelerated growth: Strong organic growth of 50% annually in maintenance and installation services

Competitive positioning: Peers and customers in landscaping and real estate are demanding more environmentally aligned solutions

Expanding market: Large and new markets in the Florida area are growing the business, including continuing acquisitions

Overview

Sector	Business and consumer services
Head office	Fort Myers, Florida
Employees	1,245

Our ESG KPIs

Social KPI 1	Lost-time injury frequency (# accidents per million hours worked with more than 1 day leave)
Social KPI 2	Gender diversity (across employee base)

Material themes

Environmental compliance

Ensuring compliance with key state spill-prevention, control and countermeasure regulations and hazardous substance management

Better environmental management

Seeking cost efficiencies and sustainable practices by investing in circular mulch, smart controllers and drip irrigation

Employee health and well-being

Ensuring the health and well-being of employees on-site at Juniper facilities and off-site at client sites

Carbon emissions

Understanding the company's baseline carbon footprint and implementing a carbon-reduction plan

Climate action

Developing and retaining inclusive business practices, and maintaining a diverse board and workforce

2021 highlights

In the first 100 days after the investment closed in 2021, Juniper took impressive steps to be ESG-aligned.

ESG issue prioritisation

The company started an ESG review process with its management to prioritise material issues, assessing the current state of initiatives and setting future ambitions.

Sustainable operations

Juniper is exploring funding from the Bregal SD Fund, to develop a circular mulch approach to converting yard waste into usable compost at the homeowner associations, commercial sites and municipalities it services.

Community engagement

The company launched the Juniper Cares Employee Relief Fund, which is matched 1:1 by the CEO.

2021-2022 highlights

Bridging the gender gap

Juniper launched a programme to bring more women into technical roles in the maintenance division. The programme has resulted in a 164% increase in gender diversity in the maintenance function since 2020.

ESG key performance indicators

Social

7.77

Lost-time injury frequency (# accidents per million hours worked with more than 1 day leave)

164%

Increase in gender diversity in the maintenance function since 2020

As a company that designs, maintains and enhances commercial landscapes across the country, sustainability is central to Juniper's brand and corporate purpose. We believe that keeping our employees safe and embracing further environmentally sustainable practices will help us be more resilient in the decades to come.

Brandon Duke

Juniper Chief Executive Officer

ESG opportunities

Emissions reductions and electrification

Juniper's fuel-related emissions from owned and leased vehicles and equipment form a large part of its emissions, along with those from purchasing electricity to run its offices and facilities. By gradually transitioning its equipment to electric, installing battery storage infrastructure and optimising its fleet routes, the company can reduce its emissions.

Environmental management

The company seeks to invest in a broad range of environmental initiatives that also reduce cost such as turning yard waste into usable compost, xeriscaping, using more native plants, and managing water consumption more effectively in its own premises and customer locations.

Employee health and well-being

By expanding the existing Juniper University safety training, the company will improve the skills of its employees and customers.

Bregal Private Equity Partners

Bregal Private Equity Partners (BPEP) seeks long-term partnerships across a range of strategies and geographies, from newly formed funds set up by experienced investors to long-standing, established funds. ESG has always played a fundamental role in our approach. But now, more than ever, it has become a defining characteristic of our investing process and how we work with GPs.

Assess

We play the part of active influencers to improve the ESG practices of the GPs we invest with. When we consider an investment, BPEP dives deep to understand the ESG dynamics of every fund we pursue. We conduct a detailed ESG assessment, often including a call with our ESG team, to understand each fund's ambitions relating to sustainability and how they work with their portfolio companies. We score our GPs based on a select number of criteria (such as governance, diversity metrics, health and safety initiatives, and ongoing ESG monitoring) and core ESG risks for every fund, which we include in our investment memos. Our rigorous Investment Committee process, with deep engagement from our ESG team at every meeting, ensures a holistic understanding across all fund investments. Our side letters also include extensive requirements about responsible investing and how we will monitor ESG progress throughout the course of our investment. Over 40 GPs signed on to the Principles for Responsible Investment (PRI) and we mandate that our GPs have a documented ESG policy or will have one within one year of us investing in them.

2021-2022 highlights

Engage

Over the past 20 years, BPEP has made about 200 commitments. Often, we invest with GPs over the course of many funds. Once we invest with a particular GP, we work hard to add value as partners. This includes providing our best ESG insights – such as which ESG consultants or data platform we find most useful, and how to set core benchmarks like science-based targets across portfolio companies in various industries. Our ESG team, regarded as one of the best-in-class in the direct investing private equity landscape, offers valuable insights into how all our partners can improve their ESG approach.

Monitor

Our side letters stipulate regular ESG clauses that enable us to carefully track the evolution of portfolio companies throughout their ownership period. We will update our ESG assessment of all core GPs in the fund on an annual basis. Our intent is to improve the beneficial impact of our portfolio – on society and climate especially – and we aim to form a close and long-lasting partnership with GPs to do that. We are proud of what we have accomplished, and of the strong relationships built so far, but we are also keenly aware of the continued influence we need to exert on areas such as setting emissions-reduction targets.

I started my career in PE 15 years after the first global Earth Day event and 20 years before the term ESG was coined. My tenure in PE has been characterised by a steady and accelerating need for action on the E, S and G fronts. More recently there has been a growing momentum in the sector from intention to action. Nowhere has this transition been more clear than what I have seen at Bregal over the past five years.

Chuck Flynn Partner, BPEP

GP ESG engagement approach

Prior to making a commitment to a manager, BPEP will conduct an analysis of their ESG policies and practices. This is a score based on five components: 1. Policy, governance and leadership, 2. ESG integration, 3. ESG monitoring, 4. Climate change, and 5. Diversity, equity and inclusion.

CEO letter

This assessment will be conducted on an annual basis and the underlying manager's score evolution tracked.

2021-2022 highlights

Employee philanthropy

Our employee philanthropy programme supports employees in taking an active role in charitable organisations. We do this through grants from the COFRA Foundation, that seek to address themes such as education and training, services for underprivileged young people and families, and climate-change mitigation. We are especially focused on issues of sustainability and inequality.

COFRA Foundation grants

The COFRA Foundation funds employee philanthropy activities across COFRA organisations, in the spirit of engagement with, and commitment to, the communities they live in and work with. Through its programme, the COFRA Foundation wants to connect and inspire colleagues across the globe to contribute to causes close to their hearts.

City Harvest

City Harvest collects nutritious surplus food from various foodindustry providers for redistribution to vulnerable people around London. Bregal employees volunteered their time, offering their time to help package and sort through food parcels, as well as sponsoring the van that delivers the food around London.

2021-2022 highlights

2021 grant amount:

Per Scholas

Per Scholas works to increase access, and create opportunities, for adults seeking employment in the tech sector. Its mission is to advance economic equity through access to quality tech jobs, with typical Per Scholas graduates experiencing a 320% increase in wages, after training.

2021 grant amount:

€40,174

Dein München

Dein München helps ensure equal access to job opportunities for young people – who can subsequently contribute to a diverse and productive economy. Across 475 projects since 2014, Dein München has supported more than 7,500 young people in rewriting their futures.

2021 grant amount:

New York Sun Works

New York Sun Works educates the next generation of environmental innovators, giving them the skills to create solutions to global resource challenges. It has built over 180 innovative educational labs and helped more than 60,000 students learn about sustainability topics.

2021 grant amount:

€44,638

Grant-matching programme

As a socially conscious firm, we support charitable causes globally, through the COFRA Foundation. By supporting initiatives important to Bregal employees, we aim to strengthen the spirit of engagement and willingness to volunteer, which are core elements of our values.

Through the grant-matching programme, the COFRA Foundation will match any charitable contribution made by an employee, up to €5,000 per employee in any calendar year.

Grant spend

Grant spend 2021	€768,257
Grant spend since 2011	€4,630,184

The contents herein are not to be construed as legal, business, ESG or tax advice, and each prospective investor should consult its own attorney, business advisor, and tax advisor as to legal, business, and tax advice.

The case studies referenced in the Presentation are for informational purposes only to illustrate how Bregal Investments seeks to incorporate environmental, social and governance ("ESG") initiatives within its portfolio companies. There can be no assurance that any Bregal Investments vehicle will be able to implement its ESG strategy or achieve its ESG objectives. In considering any performance information contained herein, recipients should bear in mind that past, targeted or projected performance is not necessarily indicative of future results, and there can be no assurance that comparable results or that target returns, if any, will be met.

This Presentation includes forward-looking statements, which includes all statements other than statements of historical facts, including any statements preceded by, followed by or that include forward-looking terminology such as the words "targets", "believes", "estimates", "expects", "aims", "intends", "can", "may", "anticipates", "would", "should", "could" or similar expressions or the negative thereof. Any forward-looking statements contained in this Presentation are subject to known and unknown risks and uncertainties and other important factors beyond Bregal Investments' control that may cause actual results to be materially different from those contemplated by such statements. These forward-looking statements speak only as at the date of this Presentation. In particular, details included in this Presentation are subject to updating, revision, further verification and amendment, although there is no obligation to do so, and refer to events as having occurred which have not occurred at the date of this Presentation but which are expected to happen in the future. No representation or warranty is made as to future performance or such forwardlooking statements.

IMPORTANT INFORMATION FOR RECIPIENTS IN THE FOLLOWING JURISDICTIONS

United States of America

Any future offering of interests will not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), or any state or other securities laws or the laws of any non-U.S. jurisdiction. Any future offering of interests will be offered and sold only to US investors that are "accredited investors" as defined in Regulation D promulgated under the Securities Act and "qualified purchasers" as defined under the U.S. Investment Company Act of 1940 (the "Investment Company Act") Any future interests offered will be sold for investment only and will be subject to restrictions on transferability and resale and may not be transferred or resold except as provided in the subscription documents relating to any such offering, and as permitted under the Securities Act. Accordingly, investors should be aware that they will be required to bear the financial risks of any investment in such interests for an indefinite period of time. None of the limited partnerships to which any future offering relates will be registered as an investment company under the Investment Company Act, as amended. Investors will not be afforded the protections of the Investment Company Act of the U.S. Investment Advisers Act of 1940, as amended.

United Kingdom

This Presentation is being communicated in the UK by Bregal Investments LLP, which is authorised and regulated by the FCA, only to persons who (i) fall within Article 14 ("Investment Professionals") of the UK Financial Services and Markets Act 2000 (Promotion of Collective Investment Schemes) (Exemptions) Order 2001 (as amended) (the "CIS Order"), (ii) fall within Article 22 ("High net worth companies, unincorporated associations etc.") of the CIS Order, (iii) fall within one or more of the categories of persons referred to in COBS 4.12 of the FCA's Handbook of rules and guidance, or (iv) are persons to whom this communication may otherwise be lawfully communicated (the persons referred to in (i) – (iv) being referred to collectively as "Relevant Persons"). This Presentation must not be acted on or relied on by persons who are not Relevant Persons. Any shares or interest to which this relates are available only to Relevant Persons.
